

Hivedome has recently integrated ITAS to allow e-Accounting and/or e-Invoicing for clients in Latin America.

When a company is flagged as a Brazil Domestic operation, additional extensive functionality is used to manage the full Nota Fiscal Eletrônica (NF-e) On Shore Process.

All standard ITAS Factory Management functionality (e.g. Import Deliveries, Deliveries In, Deliveries Out, Internal Transfers Out, Internal Transfers In, and Stock Summary) integrate with the Nota Fiscals; for example,

- the warehouse report includes NF-e references and
- when imported (Import Deliveries menu option), those references are recognised and flow back to the NF-e itself.

Key features include:

- Freight orders;
- Reviewing NF-e received and Freight NF-e received;
- Link NF-e to Contracts;
- Create NF-e from a Contract;
- NF-e to Inventory/Shipment or Domestic Sale;
- Symbolic Return NF-e;
- Export NF-e or Domestic Sale (when Symbolic Return required);
- Export memorandum;
- Issue Nota Fiscal, View/Edit Existing Nota Fiscals, View/Edit Existing Freight NF-e; and
- Refund NF-e.

Similarly, the standard invoicing routine recognises a Brazil Domestic operation and presents a specific option to invoice freight (Conhecimento do Transporte Eletrônico (CT-e) which flows back to the linked contracts.
